

I want to express my strong position AGAINST allowing LPFM stations to take priority current FM translator service. K-LOVE is an FM station that I currently listen to every day. My community is benefited in that we have a choice to listen to a positive and safe for the entire family radio station that does not even have commercials. Our community would be injured if this service was to go away. It is the overall public interest to provide an outlet for a wide range of listening needs. K-LOVE provides this.
